## INTRODUCING SEA ISLE SUPREME *A Golf Course Grass to Edge out all Others*

ATHENS, Ga. – Sea Isle Supreme Growers Association announces the release of a turf grass that's a hole-in-one for golf courses around the world. Scheduled to enter the golf course market in summer 2006, Sea Isle Supreme is a new and improved semi-dwarf seashore paspalum variety that's unmatched in low maintenance and irrigation requirements, as well as overall appearance and playability.

This grass is so revolutionary that Golf Digest Editor Jerry Tarde ranked "paspalum grass that grows in saltwater" at number three in his list of *Top 5 All-Time Golf Inventions*, featured in the January 2006 issue of Golf Digest. Tarde even valued it above the golf cart, which came in at number five on his list.

Sea Isle Supreme will be available early this summer. But with high demand, orders should be placed now to ensure prompt delivery once the grass is ready for shipment. Orders can be made directly with any of the five turf farms within the Sea Isle Supreme Growers Association.

"Sea Isle Supreme will revolutionize the golf industry," said Sea Isle Supreme Growers Association President John Holmes. "It's one of the most environmentally friendly turf grasses ever grown, offering today's golf courses the ability to irrigate using alternate water sources with a high salt content or waste water."

This tournament quality, Georgia Certified turf grass is the ideal choice for golf course greens, fairways, tees and roughs. Sea Isle Supreme's incredible beauty, versatility and easy maintenance make it the perfect solution for golf courses around the world. For more information, go online to [seaislesupreme.com](http://seaislesupreme.com) or contact the Sea Isle Supreme Growers Association at 877-887-3626.

Developed by Dr. Ron Duncan, former professor of Crop and Soil Sciences at the University of Georgia, USA, Sea Isle Supreme can be irrigated using alternate water sources including salt water and waste water. This cutting-edge semi-dwarf seashore paspalum variety is the most salt tolerant of the other commercially grown paspalums. It's an ideal choice for golf course greens, fairways, tees and roughs. Sea Isle Supreme is available through the following farms within the Sea Isle Supreme Growers Association: Diamond Turf, Phillip Jennings Turf, Pike Creek Turf, SMR Farms, and South Florida Grassing. For more information, contact the Sea Isle Supreme Growers Association at 877-887-3626 or visit us online at [seaislesupreme.com](http://seaislesupreme.com).
