## SUPREME GRASS REVOLUTIONIZES GOLF INDUSTRY

ATHENS, Ga. – Sea Isle Supreme Growers Association introduces a cutting-edge Georgia Certified turf grass that's perfect for golf courses from tee to green. An extremely versatile grass, Sea Isle Supreme accommodates a wide range of mowing heights and can be used on tees, fairways, roughs and greens.

Sea Isle Supreme looks great and plays even better. This tournament quality grass is a low-growing, rapidly spreading semi-dwarf product. With its excellent cool weather color retention, Sea Isle Supreme features year-round good looks. And it withholds its appearance even under the toughest conditions, offering superior recovery from injury.

As water quality, quantity and conservation concerns continue to drive the global golf course landscape, Sea Isle Supreme offers an eco-friendly and low-maintenance alternative to the grasses of the past. It is more salt tolerant than any other commercially grown paspalum and can tolerate most types of alternate water sources including wastewater, effluent gray water, brackish water and even ocean water/fresh water blends. Plus, it requires less nitrogen and less water than other warm season cultivars. As water quality decreases and salinity challenges increase, specifying a high-caliber grass like Sea Isle Supreme can reduce a golf course's long-term maintenance costs and improve grass management.

"No other grass compares to Sea Isle Supreme in maintenance, appearance and playability," said Sea Isle Supreme Growers Association President John Holmes. "It's an ideal solution for golf courses that demand the best, yet want the simplest in irrigation and overall upkeep. Sea Isle Supreme is the greatest water conservation decision any golf course can make."

Developed by Dr. Ron Duncan, former professor of Crop and Soil Sciences at the University of Georgia, USA, Sea Isle Supreme can be irrigated using alternate water sources including salt water and waste water. This cutting-edge semi-dwarf seashore paspalum variety is the most salt tolerant of the other commercially grown paspalums. It's an ideal choice for golf course greens, fairways, tees and roughs. Sea Isle Supreme is available through the following farms within the Sea Isle Supreme Growers Association: Diamond Turf, Phillip Jennings Turf, Pike Creek Turf, SMR Farms, and South Florida Grassing. For more information, contact the Sea Isle Supreme Growers Association at 877-887-3626 or visit us online at [www.seaislesupreme.com](http://www.seaislesupreme.com).
